Forecast for Tuesday 25 May 2021

Weather: Cloudy with showers overnight that occasionally merge into longer spells of rain giving poor visibility over the summits, starting to improve after dawn. Further showers developing during the morning that may be heavy at times with a very low risk of thunder. Sunny spells likely outside of showers, but feeling cool with a strong breeze. Showers easing into the evening and skies gradually clearing overnight.

Chance of cloud free mountain/hill tops above 600m: 30% increasing to 90%

Visibility: Poor overnight with cloud lowering to around 500m. Generally good for the remainder of the day, but prolonged spells of moderate to poor visibility likely in showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Showers continuing to give poor conditions at times, reducing visibility and becoming slippery underfoot, good waterproof equipment is recommended. However, high UV levels means sun protection may be required outside of showers.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Mon 24 May 2021	10.2mm	10.2mm	11mm

Forecast for Wednesday 26 May 2021

Weather: Low cloud increasing from the north shortly after midnight, with light rain across the region and poor visibility on summits. Rain turning heavy but more sporadic across the north during the afternoon, before conditions finally improve late afternoon with cloud gradually breaking up to leave a bright and sunny end to the day.

Maximum wind: West-northwesterly 10-15mph gusting 20mph.

Chance of cloud free mountain/hill tops above 600m: 50% increasing to 90%.

Visibility: Poor in any low cloud at first, bases around 400-500m. Good becoming excellent during the day.

Temperature: **Valleys:** Plus 6 Celsius increasing to Plus 11 Celsius.
At 600m: Plus 4 Celsius increasing to Plus 7 Celsius.
Freezing level: Above summits.
